

Pediatric Sleep Center

Accredited and specialized

The Sleep Center is accredited by the American Academy of Sleep Medicine (AASM). This certification is a rigorous process undertaken every five years to ensure quality testing. The staff is extremely proud of this distinction.

The fully accredited Sleep Program offered at Cardon Children's Medical Center assists physicians in recognizing sleep disturbances including breathing, narcolepsy, insomnia, snoring, parasomnias and circadian rhythm disorders.

Our staff includes registered sleep technologists, who are specially trained in sleep monitoring techniques, and physicians, who are board-certified in sleep medicine.

We offer high-tech sophistication in a homelike setting so that testing and evaluation are as easy and comfortable as closing your eyes and falling asleep. All sleep testing is performed as close to the patient's normal sleep time as possible. Research has shown that tests performed during the daytime do not produce the same results as nighttime testing because the patient's sleep pattern and depth are not adequate during these hours.

We accept all major insurance contracts and offer a variety of appointment times. The Sleep Center is conveniently located on the same campus as the main Cardon Children's Medical Center campus. Reserved parking is available for our patients.
